Established as a subsidiary of Tanriver Group of Companies, Kaleblokbims A.Ş provides the production and sales of light construction elements and light construction materials that will increase the quality of life and manufacturing in the construction sector, as well as export. Our company produces lightweight construction elements such as block-pumice, hollow blocks, solid plates in its production facility, and offers a wide range of raw materials to its customers by sieving and expanding the pumice and perlite mines that are extracted from the mines in the Eastern Anatolia Region and processed in various sizes. Group Companies:

KALEBLOKBİMS; We produce insulated lightweight building materials, pumice blocks, hollow blocks, solid slabs and bricks in our Kaleblokbims factory in Erzurum/Turkey. www.kaleblokbims.com

K-FIX; In our central factory in Erzurum/Turkey, we produce many construction chemicals such as tile and ceramic adhesives, joint fillers, pumice and natural stone adhesives, mineral added plasters, thermal insulation board adhesives in the field of construction chemicals.

DOGUPERLIT; We produce expanded perlite in many different sizes with the micronized perlite expansion plant that we have put into operation in our central production factory in Erzurum/Turkey. www.doguperlit.com.tr

PT POLITEK; In our Trabzon-based company PT POLITEK, many materials using styrofoam such as thermal insulation boards, compressed EPS boards, styrofoam hollow blocks, fish boxes are produced. www.ptpolitek.com

KAPTAŞ; Kapadokya Doğal Taş A.Ş., our group company, produces decorative and mosaic natural stones for interior and exterior use in Nevşehir Ürgüp central production facilities. www.kaptas.com

ERKALE; Ercale Lightweight Building Materials Our factory in Erzincan produces pumice blocks, hollow blocks, solid slabs and bricks, reinforced concrete pipes, paving and keystones. www.erkaleinsaat.com

TABLE 2

AGS Construction Food Petrol Textile Consulting Foreign Trade Inc. We have been exporting construction materials to many countries of the world since 2016, after having much older foreign trade experience. As AGŞ, we have made and will continue to make great contributions to the development and expansion of our country's foreign trade. With our foreign trade experience and knowledge, we have always prioritized our sense of responsibility towards our customers abroad, and we have given great importance to their satisfaction and will continue to do so at all times.

We have always kept our ties with our Suppliers in Türkiye strong and we will take care to keep them strong in the same way. Our Goals in Export are always to successfully ship the products produced in our country to different parts of the world as much as possible

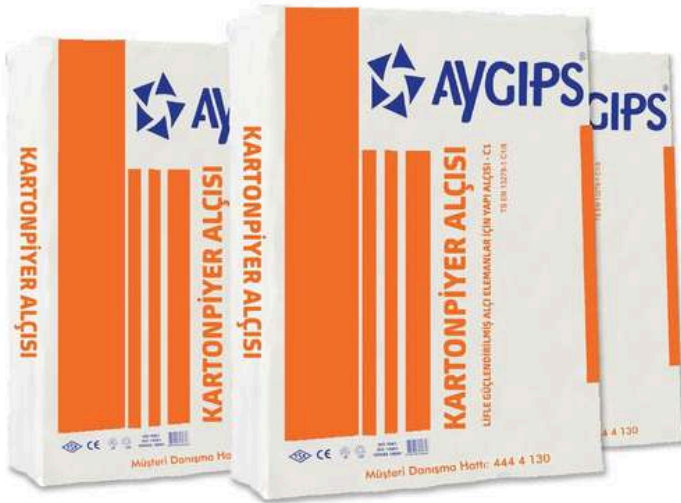

TABLE 3

Under the name Polat Kardeşler, Ahmet Polat was established in 2009 with the confidence of 40 years of experience to operate in the construction and building materials sector. With the floor and electrical installation devices developed by our Ahmet Polat R&D and innovation team, we introduced the PY PLAST brand to the building and construction industry in 2018, which we produced in our own facilities. We meet the needs of our facilities operating at full capacity through the range of innovative products we have introduced to the industry. Our main goal is to maintain our leading role in the construction and building materials market through our customer-oriented service approach, strong partnership structure, wide product range, advanced technological infrastructure and our experience. The company's management, which closely follows developments in the sector and new market demands, continues to be one of the leading companies in the sector thanks to its solid administrative and financial knowledge.

TABLE 4

AYES Wire Mesh, has been founded in Isparta, Turkey in 1978 to start wire mesh production. We earned growth trend by having progress in machinery, production technology and human resources. Ayes built its second modern-technology factory of wire mesh and fence in Izmir, Turkey in 2000 to increase production capacity. We became the largest wire mesh producer in Turkey by establishing our third factory in Kocaeli - Dilovası, Turkey in 2006. Since 1978, Ayes has been serving the construction industry in the world as the pioneer of mesh wire production, complying with global standards.

OUR MISSION: Ayes is a wire mesh manufacturer, aiming lean production and rational profitability in global standards by having expert team members, looking out for customer satisfaction by quality and utilizing latest technology of production.

OUR VISION: Our vision is to be leader of wire mesh sector by being a global exporter and develop market-oriented products for local and global markets. We are going to make use of our current strength and advantages, offer high quality by lean production, top technology of production and supply.

EKOTEK
Heat Technology

Ekotek took its first step into the manufacturing world in 1999 with the production of stainless steel bread ovens. Our company quickly made its mark in the industry by integrating various fuel systems, including solid fuel, natural gas, and diesel, to meet the heating, combustion, and steam needs required by these ovens. Recognizing the potential and the needs in Turkey's industrial heating sector early on, our founder made a decisive commitment to continuously develop heating and combustion technologies. Drawing on the experience gained in its early years and considering the market's needs, Ekotek expanded its focus beyond just ovens. The company began designing and producing steam boilers, hot water boilers, thermal oil heaters, superheated water boilers, boilers, and more, which could be used across various industrial sectors. Throughout this process, Ekotek placed great importance not only on design and production but also on the certification and documentation stages of these products. Today, Ekotek, with over 25 years of experience, exports to more than 28 countries from the Aydın Organized Industrial Zone. Since its founding, the company has solidified its position as a leading brand in heating technologies, steam boilers, hot water boilers, thermal oil heaters, superheated water boilers, boilers, and more, drawing on the knowledge and experience it has gained over the years.

TABLE 6

Nowadays , it is inevitable that modern buildings and homes must meet the needs of comfort sound , heating, aesthetics , and fire control along with being a place for humans to live. In addition to the highstandards of living in modern homes and buildings. are indispensable for people living in them to live a happy and peaceful life.

Although building chemicals are present in all stages of construction processes , they are more qualified are the building chemicals that play an important role in habitat detection.

Our company offers its products on the market under the names Fixkim and Fixser, internal and external insulation plasters in the field of construction chemicals, special products such as insulation between floors and balconies In addition to more than 300 products from the powder range. Our company , which strictly applies general quality policies that are accepted and specialized in its field. It continues to satisfy its customers with its staff and understanding of hassle-free service.

ISO 9001, TSE, CE, Our company, which has GOST-R quality management and Erzincan certificates in total 7. 500 m2 closed area in Erzincan, continues mass production and does not compromise on quality. Without putting its products into domestic and foreign markets.

TABLE 7

GECEM

Gecem Lighting creates new generation individual lighting solutions, since 1997 and offers economic, ergonomic and environment friendly products, which are also regarded the architectural and aesthetical values. Being active in 40 different countries, Gecem works with expert partners in various regions of the world.

Gecem collaborates with architects, building engineers, lighting designers, electrical consultants, electricians, international distributors and wholesalers as partners.

Gecem is not only producing best quality lighting luminaries, but also tries to integrate it to the architectural elements along with the industrial design. Quality of the light adds extra values to the both of indoor and outdoor areas. Gecem cooperates with the experts in different fields, in order to maintain true and efficient light in different architectural applications. This is why Gecem is the "way of light" and continues to be the leader in the field of technical and architectural lighting applications.

TABLE 8

Hamton metal industry and trade limited company is a pioneer in the sector with its quality and product variety. At the beginning of our production that forms the Hamton metal identity; price attractiveness, stable growth, quality materials and qualified workmanship bring us success.

Metal service center; is one of the basic principles of our accumulation. We attach importance to working meticulously from the raw material stage to the finished product stage in the products we produce. We work harder than yesterday to provide you with the best service.

We provide laser cutting and bending services for suppliers and produce flat sheet metal and trapezoidal sheet metal.

9

İSMODE
MOBİLYA

You will not want to leave your homes and offices with the model specially designed for your tastes. Ergonomic design, innovative appearance and air that catches the lines of the era will be the most magnificent part of your home. While the warm appearance of wood warms you up, simple design lines will create an extraordinary effect and bring dynamism to your home and office.

TABLE 10

SOYBAS STEEL INDUSTRY & TRADE INC. as your reliable partner in the steel industry.

About SOYBAS:

- Established in 1961, SOYBAS is one of Turkey's oldest and largest steel trading and stockholding companies.
- For the past three years, SOYBAS has been ranked among the 500 largest companies in Türkiye and is consistently listed among the top 100 companies in the steel industry.
- Our lasting partnerships with major Turkish producers and the world's top steel manufacturers allow us to offer unparalleled pricing and delivery terms customized to your requirements.
- Our extensive experience and commitment to excellence make us a trusted partner for steel supply worldwide.

SOYBAS Product Range:

We supply a comprehensive range of flat, long, and tubular carbon steel products, including:

- Raw materials: Slabs, billets
- Structural steel: De-bars, wire rods, angles, beams (UNP, IPN, IPE, HEA, HEB), round, square, flat, and T-bars
- Flat products: Hot-rolled (HR), cold-rolled (CR), galvanized (HDG), pre-painted, chequered, corrugated & trapezoidal sheets, Galvalume
- Pipes & Tubes: ERW tubes (structural, water & gas), hollow sections, SSAW/LSAW pipes, seamless steel pipes
- Additional steel products: Nails, welded mesh, wires

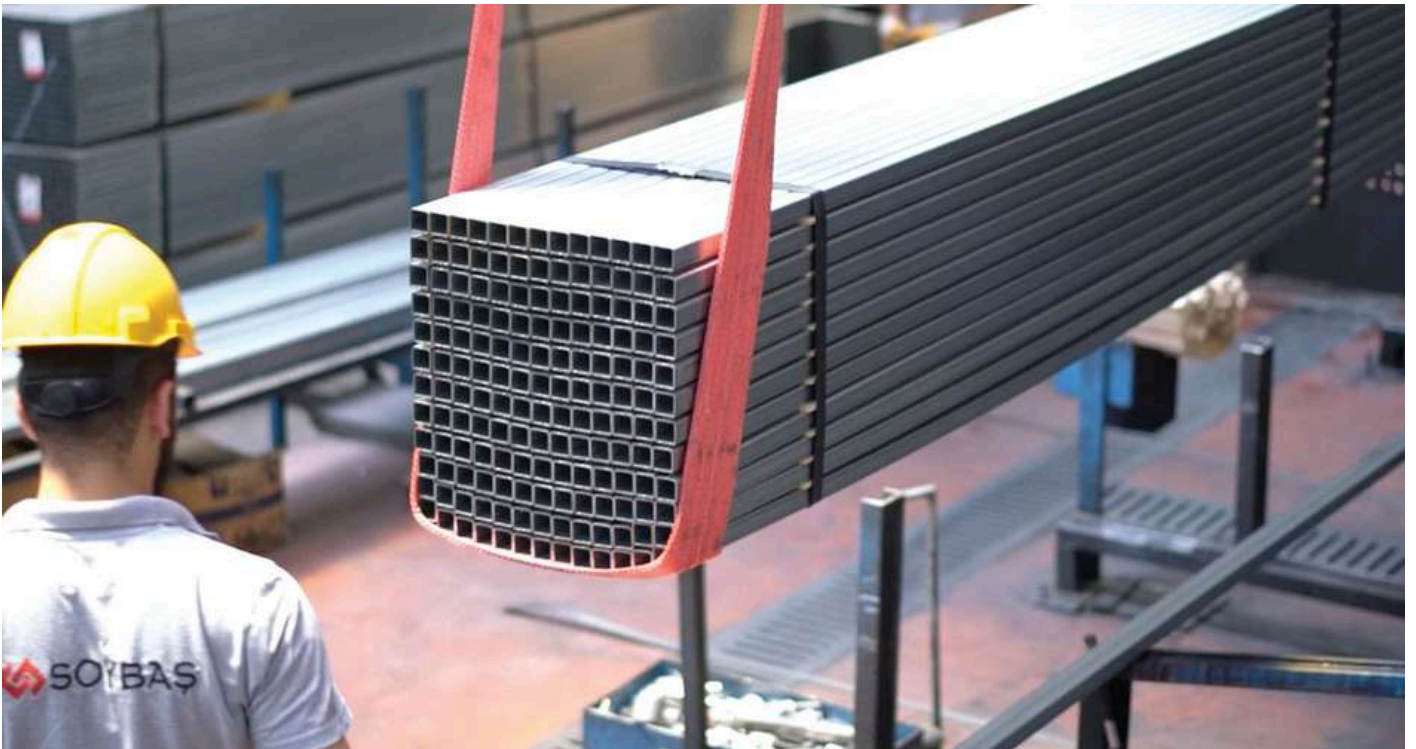

TABLE 11

As Teknopropanel, we have been working to render world-class service with our ideas outside of the box to our customers, since the day of establishment in 2005. We provide service to the industry with our 4 different brands under Teknopropanel umbrella including Teknopropanel Sandwich Panels, Deltapan, Teknopor EPS Products and Teknosistem Exterior Thermal Insulation Systems. We began the journey from our plant in Mersin where our headquarter and first production facility was established on an area of 34.000 m². Based on our objective to manufacture at a high standard, our Sakarya factory which covers an area of 35.000 m² was established in 2013. We sustain our growth strategy with our latest investments that we open in 2016 in Izmir, which covers an area 46.000 m² and in 2018 in İstanbul which covers an area of 8.000 m². We increased the area of our production facilities to 123.000 m² in total.

Today, our facilities, where Sandwich Panel, EPS Products and Trapezoidal Sheets are manufactured, are among the most leading edge production facilities in Europe. Thanks to our industry-expert R&D team and new investments realized, we provide fast and effective solutions to the needs of our customers with our 13.5 million m² Sandwich Panel and 1.6 million m³ EPS production capacity. We carry these products, manufactured on our own land, with pride to four corners of the world by exporting them to 5 continents, and we fly the flag of our country wherever we provide our services. With the success we gain; we are glad and proud to rank among Turkey's Top 500 Industrial Enterprises list of İstanbul Chamber of Industry and be the leading company in the industry. We strive for the better every day and keep going with firm steps to become a world brand, with our 460 employees and approximately 100 Authorized Service Points.

TABLE 12

Bilkent Holding was founded in 1968 by our founder, Prof. Dr. İhsan Dođramacı, to operate in the construction sector. TEPE BETOPAN YAPI MALZEMELERİ SAN. TİC. A.Ş., operating under Bilkent Holding, established Turkey's first cement-bonded particleboard factory in Bilkent, Ankara in 1984, starting production under the registered brand betopan® and achieving its first export in 1987. In 1999, the factory was revised using modern technology systems, doubling its capacity. In 2001, as a result of ongoing R&D efforts, the company added betopanplus®, yalıpan®, and taşonit®, all of which have patented A2 fire resistance classification, to its product range. In 2008, the production line located in Arhavi was moved to the Ankara-Bilkent facilities, consolidating all production at a single location. In response to the growing interest and demand for exterior panels and cladding systems, the company expanded its product range in mid-2011 with new textured surface products. In 2014, with an investment made in the Ankara ASO 2nd Organized Industrial Zone, the company began production of next-generation fiber-reinforced cement boards under the tepePAN® brand at its factory certified with LEED Gold.

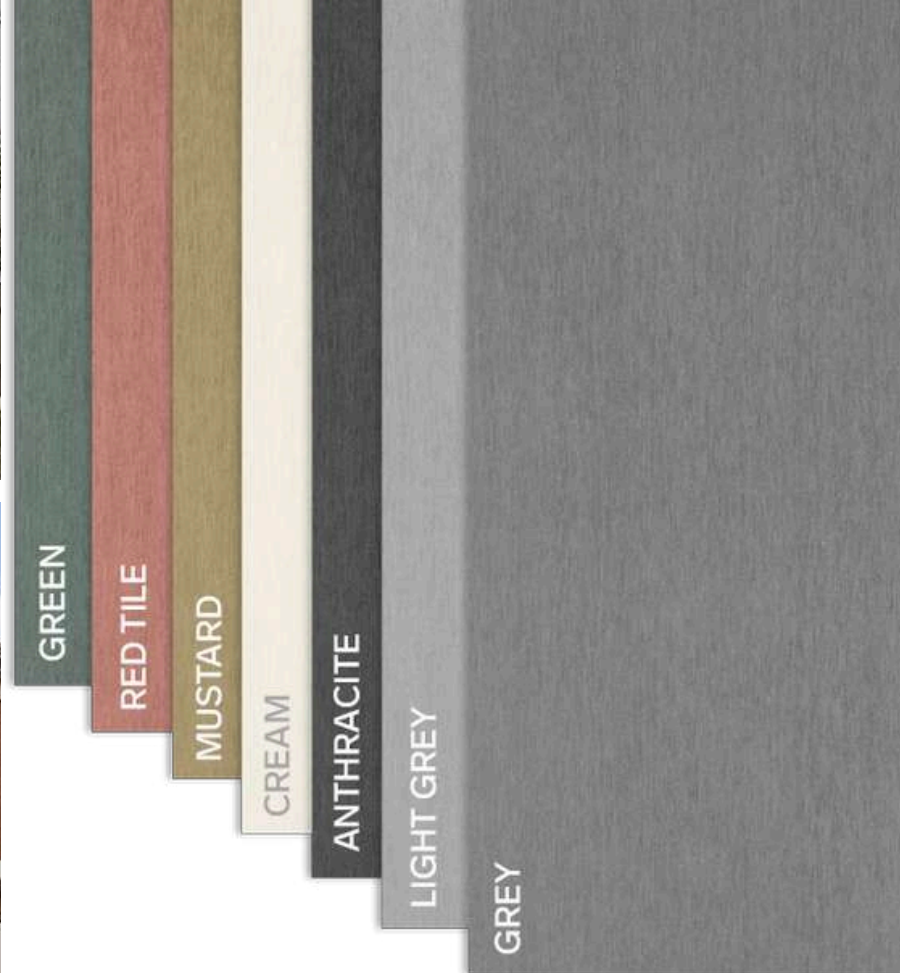

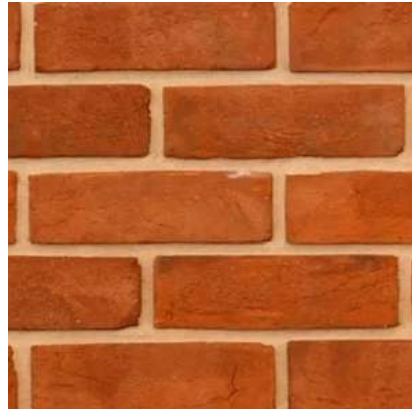

TABLE 13

Operating since 1991, Uzunyayla Group contributes to Turkey's sustainable development as a well-established organization offering a wide range of services in construction, production, energy, and foreign trade. Our company has made it its mission to implement world-class projects with years of experience and an innovative perspective. While adding value to both urban and rural areas with numerous housing and infrastructure projects completed to date, we are shaping the future with advanced technology and high engineering solutions.

Our areas of operation include luxury housing projects developed under the Vitalia brand, large-scale hydroelectric power plants, renewable energy plants, and international trade. In our production facilities, many building materials from handmade and machine-made bricks to concrete pipes and interlocking paving stones are produced, and these products are offered in local and international markets in compliance with high quality standards.
